

DHYEYAM

**NATIONAL LEVEL ONLINE CME ON NEURO DEGENERATIVE
DISORDERS IN CHILDREN
DEPARTMENT OF KAUMARABHRITYA
GOVT. AYURVEDA COLLEGE
KANNUR, KERALA**

Neurodegenerative diseases are diverse conditions characterized by selective dysfunction and ongoing loss of neurons, glial cells and the neuronal networks in the brain and spinal cord with wide variety of symptomatic manifestations, typically slowly progressive with variable gradual neurologic dysfunction. Many children all over the world are suffering from neurodegenerative diseases, which are illnesses that lead to cell death in the brain. Some neurodegenerative diseases affect the basal ganglia and lead to movement difficulties. Other diseases cause more widespread cell death and lead to memory loss. Research and development of efficient therapeutic strategies for the treatment of neurodegenerative diseases is one of the most risky and challenging problems of neurology. At the same time, the social and economic importance of the solution of these problems outweighs any possible risks and development costs.

Department of Kaumarabhritya, Government Ayurveda College Kannur is organizing **“DHYEYAM” - 5 day National Level online CME from January 15 to 19 , 2024**. Eminent scholars will cover all the relevant areas of paediatric neurodegenerative diseases through both ayurvedic and contemporary medicine point of view. CME is being planned to update the knowledge by providing free access to academicians, practitioners of Ayurveda.

We expect your esteemed presence to make the event a grand success
